

## **Are you taking gabapentin or pregabalin? (Lyrica®, Alzain®, Neurontin®)**

The law is changing from **1 April 2019**.

Pregabalin and gabapentin are being reclassified as  
**controlled drugs.**

**Your GP and local pharmacy will ensure you continue to get  
the medicines you need.**

**Please remember to order your medicine in good time.**

There will be some changes to the rules:

1. Only 30 days' supply is allowed on one prescription.
2. You must collect medicines from the pharmacy within 28 days of the date on the prescription (which is not always the date the prescription was signed).
3. Any medicine 'owed' to you by the pharmacy must also be collected by that date.
4. All patients will need to request repeat prescriptions each month from their GP practice. It will no longer be possible to get your medicine from the pharmacy using repeat or 'batch' dispensing.
5. You or your representative will need to sign at the pharmacy to be able to collect your medicine.
6. If you run out or need an emergency supply, you will need to phone your practice or GP out-of-hours service. You will not be able to get an emergency supply direct from the pharmacy without a valid prescription.

**Your GP practice will make these changes before the law  
changes on 1 April 2019.**

If you have any existing prescriptions for gabapentin or  
pregabalin please collect the medicines **before** 1 April 2019.
